

COMPACT TURNER

The innovative solution for the fully automated storage process of raw sheets

The STOPA COMPACT TURNER optimizes the goods receipt process by automating several steps together. The result: maximum efficiency and ease of use.

Every step, from unpacking to positioning and storage, is optimized and automated to save time and resources. Special focus is on the preservation of raw materials. The COMPACT TURNER is therefore equipped with innovative plastic pads that ensure a flat and safe material movement.

But that's not all: COMPACT TURNER offers you ultimate flexibility, as the 360° rotatable table is operable from all sides. This allows flexible approach positions with a forklift and maximizes ease of use.

BENEFITS AT A GLANCE →

- ▮ Time-saving automation for optimized storage processes.
- ▮ Gentle sheet handling through integrated plastic pads.
- ▮ Flexible approach positions thanks to 360° rotatable table.
- ▮ Easy to operate.
